PROJECTS

e-tick [school project] | Laravel, php, Tailwind CSS, Laravel Jestream
June 2024
- Built an e-commerce website UI app using PHP and Laravel, featuring product browsing, secure checkout, order tracking, and responsive design.
- Styled the website with Tailwind CSS, creating a responsive & visual appealing user interface.

Al-qur'an Web [school project] | HTML, CSS, Bootstrap, Javascript, API
October 2023
- Designed using Bootstrap to ensure an attractive and convenient display on various devices.
- Using APIs to ensure Qur'anic data, translations and audio are always up-to-date and accurate

EbiAwae UI Store [school project] | Dart, flutter, Shared preference, Provider
November 2024
- designed a modern and responsive interface design, ensuring the app is comfortable to use on various devices with different screens.
- Use Provider to ensure efficient data management, such as product listings, product details, and shopping cart data, which are updated in real-time without compromising on performance.

gelScan [school project] | Dart, flutter, scanner
Desember 2024
- Built with a modern and responsive interface design for an optimized user experience across multiple devices.
- Scan QR codes with high accuracy and optimal speed.

bee news [school project] | Dart, flutter, API
November 2024
- designed to be responsive and user-friendly, ensuring an optimal experience across a wide range of devices.
- Displays the latest news that is automatically updated through API integration.
